ENTOMOLOGY
Cole May
$2.00 - $1.50 - $1.00

1. See General Rules.
2. A 4-H member may exhibit in the collection and/or educational class for the phase in which they are enrolled.
3. The Advanced Entomology classes are for 4-H members enrolled in a Self-Determined project.
4. All entries are to be placed in plexiglass covered (plexiglass required) wooden boxes with outside measurements of 18” x 24” x 3 1/2”.
5. All 4-H’ers may choose to use one of two taxonomies:

A. As printed in “Insects in Kansas” book or
B. As printed on the “Insects in Kansas Book: 2016 Revised Taxonomy”, which follows www.bugguide.net.
6. Each exhibitor is required to identify each box by placing an identification label bearing exhibitor’s name, county or district, the collection class, and statement of taxonomy used. One label goes in the upper left corner of the box (inside) and the other on the lower right corner of the box (outside). Arrange specimens in the box so it can be displayed lengthwise.
7. The number of orders, specimens (and families where required) must be included on the exhibitor's box identification label. Only one adult insect per species can be used in the Collection Boxes and Notebook Classes, unless labeled as male or female and correctly identified.
8. Arrangement of specimens: The preferred method is to arrange the insects in groups or rows parallel to the short sides of the box. Specimens are to be arranged by Order in the box, then Family where required.
9. Two labels should be centered on the pin beneath each specimen. First (closest to the specimen) is the common name label. The second label should include a date/locality, including both the full county name and state abbreviation.
10. The specimens should be collected by the exhibitor and should focus on Kansas insects. Insects may be collected from one county into bordering states and labeled accordingly. Please refer to “Entomology Collection Exhibit Resource” for full details on out-of-state insects in collections.

11. Only specimens of the class Insecta should be included.
12. Purchased insects are not to be exhibited in collections, but they may be used in educational displays.
13. Specimens of soft bodied insects such as aphids, lice, termites and etc. should be exhibited in alcohol filled vials; however, the use of alcohol filled vials should be limited to only those specimens that lose their shape when pinned, since the vials pose a significant hazard to the rest of the collection if they become loose in transit.

EDUCATIONAL DISPLAYS
1. Share with others what you learned in this project. Exhibit any activity or learning experience related to the field of entomology or the Teaming with Insects curriculum that does not fit into Entomology Collection or notebook classes.
2. Follow copyright laws.
3. The exhibit may be, but isn’t limited to, original works, digital presentations (must provide printed hardcopy for exhibit purposes for duration of state fair), programs, websites, games, apps, display boxes, notebooks, display or poster which you have made, etc.
4. If the exhibit is a wooden display box, it must be 18” x 24” x 3.5” with a clear plastic top (such as plexiglass) and displayed horizontally. If the exhibit is a poster, it must not be larger than 22” x 28”. If the exhibit is a display, maximum size is not to exceed a standard commercial 3” x 4” tri-fold display board.
5. Name and county/district must be clearly marked on the exhibit.

ENTOMOLOGY NOTEBOOKS
1. Individual entries are to be placed for display in a three-ring notebook for competition.
2. 4-H’ers may choose to use one of two taxonomies:

B. As printed on the “Insects in Kansas Book: 2016 Revised Taxonomy” which follows www.bugguide.net.
3. 4-H’ers who have been previously enrolled in the other phases of the Entomology project need to start with the Beginning Phase of Entomology Notebooks, not the Introductory Phase.
4. Each exhibitor is required to identify the notebook by placing a Title Page in the front bearing the exhibitor’s name, county or district, class, and statement of taxonomy used. The Title Page must include the number of orders, specimens, and families (required in Intermediate and Advanced classes).
5. Specimen pages should be grouped according to Order and shall include one page per species. If more than one insect is in the photo, an arrow to indicate identified insect should be used. Photos should be between 3” x 5” to 4” x 6”.
6. Date, common name, full county name, and state abbreviation should be included for each species.

Collector’s name on the specimen page is optional.
7. Specimen pages should have two different views of the insect if possible, a top view and a side view. If pictures are taken on different dates/localities, include information for both.
8. A statement describing the habitat where found/host plant may be included and is encouraged. It will be worth a bonus of 10 total points.
9. A divider page is to be placed in front of each Order of insects with the Order name printed on the tab of the
10. For the Intermediate and Advanced classes, insects are also to be grouped by Family behind each Order divider.

11. If the exhibitor has been in the same class for more than one year, a separate sheet of paper needs to be added stating how many years the exhibitor has been in this class of the project and what the exhibitor did this year to improve their notebook. Place this paper just behind the Title Page.

12. A special project must be completed each year and included in the notebook. See project guideline materials from the Extension Office for specifications.

3. Each exhibitor is required to identify each display box by placing an identification label bearing name, county or district, and number of specimens in the upper left-hand corner of the Plexiglass cover (inside-use clear double-sided tape to adhere gummed labels), and by attaching a label with the same information on the lower right corner of the box (outside).

More than one specimen of the same kind of rock or mineral or species of a fossil may be exhibited if this duplication represents different geological formations. Specimen label must show this distinction (Fort Hays limestone, not just limestone; exact species must have different formation names listed on the I.D. card; Composite Brachiopod from Morrill Limestone not just Brachiopod or Composita Brachiopod).

7. For geology classes 1, 2, 3 and 4, all specimens must be collected from locations in Kansas. Out-of-state specimens will not count in the minimum number for the class, nor will they be considered in the judging.
