

With much of the state still in drought conditions along with the increasing concerns over water quality, it is essential for communities to KNOW YOUR WATER. Fort Hays State Geosciences Department, K-State 105 and Twin Creeks Extension District want to help.

A limited quantity of Domestic Private Water Well Tests are available at no charge with this project in Decatur, Norton, Sheridan and Graham counties. Test includes: arsenic, chloride, conductivity, iron, manganese, nitrate, selenium, sulfate and uranium.

Are you ready to get to KNOW YOUR WATER? If so, please fill out this form and return to your local K-State Research and Extension office.

**Decatur (Oberlin)**

120 East Hall  
Oberlin, KS 67749

**Norton (Norton)**

113 N State St  
Norton, KS 67654
